EPA Approves Self-Implementing Cleanup Plan Approval for Remediation of PCB Contamination Found in Soils at the Amtrak Former Fueling Facility in Wilmington, Delaware

On July 29, 2014, EPA issued a letter to Amtrak approving its plan for Self-Implementing On-Site Cleanup and Disposal of PCB Remediation Waste found in the soil of the Former Fueling Facility located in Wilmington, Delaware, in accordance with 40 C.F.R. § 761.61(a). This plan specifically addresses the removal of the PCB contaminated soils within the footprint of the proposed ACS-64 Test/Warranty building. ACS-64 is a type of train engine. Future plan will address PCBs in soils, sediments, and groundwater throughout the Former Fueling Facility and the Maintenance Facility.
